***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-2 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 1-2 are not clearly understood because it is not clear how the voltage applied between the gate terminals of the PMOS drive transistors and the voltage applied between the gate terminals the NMOS pass transistors can be the same as described in lines 19-24, page 3; lines 32-33, page 5; lines 1-10, page 6 and in last paragraph of claim 1. Since Fig. 3 of the present invention does show that the gate terminals of NMOS pass transistors 150 and 160 are connected to the word line 210, while, the gate terminals of the PMOS drive transistors 180 and 170 are, respectively, connected to output nodes 220 and 230. Clearly, the voltages at the word line 210, node 220 and node 230 are not the same.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2818

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

No antecedent basis for "the same voltages" (line 21).

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

6. Claims 1-2 are, insofar as understood, rejected under 35 U.S.C. 102(a) as being anticipated by Portacci, 6,172,901.

Portacci, 6,172,901, discloses in Fig. 9 a SRAM cell comprising:

PMOS drive transistors 20 and 30;

NMOS pass transistors 26 and 36;

bit lines BL and \BL;

word line WL; wherein: the current flowing through each of the PMOS drive

transistors 220 and 230 is less than the current flowing through each of the

NMOS pass transistors 226 and 236 (see lines 23-30, column 7); during the read

operation, the voltage at the word line WL is inherently, must be less than the

Art Unit: 2818

supply voltage Vdd by one threshold voltage drop in either transistor 226 or transistor 236, which is considered to be less than 90% of the power supply voltage as recited in claim 2, as well known in the art.

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
